

DICKEY-JOHN® GAC2100 SERIES
MOISTURE TESTERS

The GAC2100 series grain moisture testers, offered by Seedburo, are economical non-NTEP devices. They offer precision, versatility and the accuracy of NTEP moisture testers formerly used by commercial grain facilities. The GAC2100 series displays moisture percentage, test weight or density, and temperature on a large LCD screen. Each model includes two standard RS232 printer ports. The moisture range is 5–45%, depending upon the grain type, and a grain temperature range of 32°F–122°F (0–50°C). The user can choose from over 450 grain calibrations which can be displayed in 8 different languages including: English, French, German, Italian, Portuguese, Spanish, Turkish, and other European languages.

★ USA GAC2100GI

GAC2100GI

The GAC2100GI, gray in color, is a non-NTEP moisture tester which tests for moisture in 16 standard grains: Barley 2-Row, Barley 6-Row, Corn, Corn-High Moisture, Durum, Hard Red Spring Wheat, Hard Red Winter Wheat, Millet, Oats, Rapeseed, Rye, Safflower, Soft Red Winter Wheat, Sorghum, Soybeans, and Sunflower Oil. If you do not require a commercial, Legal for Trade instrument, the GAC2100GI is at a more economical price for you. These units provide moisture reading, sample weighing, estimated test weight or density, temperature compensation and moisture correction automatically. Net wt: 26 lbs, Actual dims: 16" (L) x 15¼" (W) x 14¾" (H), Ship wt: 36 lbs, Ship dims: 23" (L) x 22" (W) x 19" (H).

★ MADE IN
★ USA GAC2100BSA

GAC2100BSA

The GAC2100BSA, blue in color and is not NTEP approved. It has a built-in hopper sensor which senses when enough grain is present for testing. Simply fill the hopper, press the load button and the test is performed automatically. Moisture percentage, test weight or density, and temperature are displayed on a large LCD backlit display. It has a built-in memory for 64 standard grain calibrations and can display in 8 different languages. This tester can also be set-up to integrate with your automatic grain sampling system for smooth flow-through operation.

The GAC2100BSA has an option for removing the bottom of the drawer allowing grain to flow through the unit into a larger container of your choice. This feature was added to keep the operator(s) from spilling grain on their counter without having the drawer inserted. Simply fill the hopper, press the load button and the test is performed automatically. Net wt: 26 lbs, Actual dims: 16" (L) x 15¼" (W) x 14¾" (H), Ship wt: 36 lbs, Ship dims: 23" (L) x 22" (W) x 19" (H).
