

Stackable Polymer Elevator Buckets

Seedburo offers 4B stackable elevator buckets which provide a range of heavy-duty CC style elevator buckets designed to outperform other agricultural buckets by offering greater capacities, longer life and cleaner discharge. This style of 4B buckets are made of virgin HDPE and will nest inside one another for reduced storage and shipping space. This feature will save you on freight charges compared to traditional buckets. The unique patent-pending design includes tapered sides for improved filling and discharge, as well as the Iceberg Edge™ — a thick front lip design which eliminates bowing, therefore maintaining the original capacity and a clean discharge. The CC-S bucket provides greater durability and maximum wear life. Also these buckets feature a wingless profile for closer spacing and greater capacities.

4B - CC-S Stackable Bucket

Nominal Size	Part Number	Dimensions				Standard Bolt Holes				Weights and Packaging
