

EASI-WAY Portable Hectoliter Test Weight Kit

The EASI-WAY Hectoliter Test Weight Kit utilizes the European standard principal of weighing a known volume of grain and determining its bulk density in kilograms per hectoliter (kg/hl). The grain sample is dropped down a stainless steel chondrometer under the restriction of a falling weight. The sample is weighed and converted to kg/hl by use of a conversion chart (Barley, Oats, and Wheat only). The EASI-WAY is matched to the EEC 20 liter volume. Meets ISO 7971-2:2009 standards.

Each kit includes: stainless steel chondrometer, cylindrical weight, digital balance, sample container, cut-off slide, conversion chart and instructions. Uses one 9V alkaline battery, included with the kit. Net wt: 7 lbs, Ship wt: 10 lbs, Ship dims: 21" (L) x 15" (W) x 11" (H).

EASI-WAY Portable Hectoliter Test Weight Kit.....No. EZ1

Seedburo Hand Type Density Testers

The Seedburo "Economy" Test Weight Scales are used to determine grain yield, bin capacities and feed and milling quality. Made of a durable molded plastic these units are ideal for on-farm and in the field use. Net wt: 2 lbs, Ship wt: 3 lbs, Ship dims: 20" (L) x 9" (W) x 9" (H).

Seedburo hand testers give fast, accurate bulk density readings. Equipped with a sliding beveled poise and a heavy gauge cast anodized aluminum cup. Built to withstand rough use with constant accuracy. Cups should be filled using one of the filling devices shown below. Each unit includes a No. 65 Strike-Off Stick. Net wt: 3 lbs, Ship wt: 4 lbs, Ship dims: 6" (L) x 6" (W) x 15" (H).

Grain Test Weight Scale (lb/bu and kg/hl)No. E26
 Fertilizer Density Scale (lb/cubic ft. and kg/cu dm)No. E37
 One Quart Weight per Bushel Tester (lb/bu) No. 26
 One Liter Kilograms per Hectoliter Tester (kg/hl) No. 26M
 One Pint Weight per Cubic Foot Tester (lb/cubic ft.)No. 37F

Anchor Grain Testing Hopper

The Anchor Hopper provides an alternative method of filling density cups for testing. The hopper and cut-off valve are made of solid brass with a standard 1 1/4" grain stream opening. The main post can be fastened to table or counter for permanent use and centering of hopper over cup. Thumbscrew provides ready adjustment to proper 2" discharge height. A hanger accommodates the hand-held devices shown above. Net wt: 5 lbs, Ship wt: 6 lbs, Ship dims: 19" (L) x 13" (W) x 10" (H).

Anchor Grain Testing HopperNo. 42

Seedburo Cox Funnel

Funnel provides for uniform "fall" of grain into a density cup at the proper 2" height for standard bulk density. Funnel is placed on the lip of the cup and filled. Slide gate lets grain fill and overflow the cup for strike-off. Seedburo offers the USA cox funnel as well as the Canadian cox funnel. Made of powder coated mild steel. Net wt: 3 lbs, Ship wt: 4 lbs, Ship dims: 15" (L) x 15" (W) x 9" (H).

US Cox Funnel with 1 1/4" Diameter OpeningNo. 29
 Canadian Version Cox Funnel with 1 1/2" Diameter Opening No. 29-CAN

Seedburo Digital Hand Type Density Tester

The HARVEST SMART Hand Held Digital Weight per Bushel Scale provides a portable and accurate method of measuring the density of your product right at the tailgate or directly from the bin. The built in scale allows the operator to see the digital display of the density in pounds per Winchester bushel (USA), pounds per Avery bushel (Canadian), kilograms per hectoliter (European), or pounds per cubic foot. Scale capacity of 3.0 lbs x 0.1 oz (1350g x 2.0g) provides a reliable and repeatable scale for easy test weight measurement. 9 volt alkaline battery included. Net wt: 6 lbs, Actual dims: 12" (L) x 4" (W) x 4" (H), Ship wt: 5 lbs, Ship dims: 15" (L) x 15" (W) x 5" (H).
